

WHAT IS CLAIMED IS

1. A game table having at cutouts at each corner of the table, said cutouts being in the shape of a holder for cards and beverages, and a holder for cards and beverages, said holder being in one piece and having a circular recess for beverages and a rectangular recess for cards.

2. The table according to claim 1 wherein the holders are secured to the table by a bolt.

3. The table according to claim 1 wherein the holders are secured to the table by double-sided tape.

4. The table according to claim 1 wherein the holders are secured to the table by hook and loop fasteners, wherein one side of the hook and loop fastener is in the bottom of the cutouts of the table, and the other side of the hook and loop fastener is on the bottom of the holder.

5. A stand-alone holder for beverages and cards comprising a box having a top, front, and at least two sides, and wherein the top includes a rectangular cutout for holding a card holder or a bidding box, and a circular cutout for holding beverages.

6. The stand-alone holder according to claim 5 wherein the bidding box comprises a top part and a bottom part; the top part includes a cut out portion which holds the bottom part in upright position, and the bottom part is angled

such that when the bottom part is placed into the cut out portion of the top part the bottom part leans backward.

7. The holder according to claim 6 wherein a divider is placed in the card storage area.

8. The holder according to claim 5 further comprising a top for the box.

9. The holder according to claim 5 further including a recess or depression adapted to hold a pencil.

10. The holder according to claim 5 including a cover having two or three sides and a bottom, and adapted and constructed so that the area of the bottom of the cover having no side is inserted into a bridge table between a frame of the bridge table and a cover of the bridge table.

11. The holder according to claim 10 further including a nipple or groove in at least one side so that the holder is adapted and constructed to snap into place when inserted into the bridge table.
